## Protect Your Nursery with Extinguish® Plus.

Extinguish® Plus fire ant bait can help protect nurseries against fire ants. Extinguish® Plus fire ant bait combines the killing speed of an adulticide and the long-lasting control of an insect growth regulator (IGR). With its two-way action, Extinguish® Plus fire ant bait is economical to use with a great price per acre and meets the USDA fire ant quarantine requirement.

# Extinguish® Plus Fire Ant Bait Fact Sheet

## Controls

Imported and native fire ants (protein feeding), harvester ants, big-headed ants and Argentine ants.

## Active Ingredients

IGR (S)-methoprene 0.25% and Hydramethylnon 0.365%.

## Fast-Acting

The adulticide, Hydramethylnon, in Extinguish® Plus bait starts killing worker ants immediately after ingestion. Noticeable reduction in the number of active workers is seen within a week.

## Long-Lasting

The insect growth regulator (IGR), (S)-methoprene, sterilizes the queen to prevent rebound and mound movement. Colony reduction begins immediately and colony elimination may be seen within 2 weeks.

## Area of Application

May be applied to, but not limited to, the following areas (please refer to the label for further sites):

- Nurseries
- Sod farms
- Golf courses
- School grounds
- Rangeland
- Greenhouses
- Sports fields
- Parks
- Pastures
- Non-bearing fruit/nut trees

## Use Rate

Broadcast – 1.5 pounds of product per acre

## Size

4.5 lb., 25 lb., and now available in 1.5 lb. size

## Methods of Application

All types — motorized spreaders, aerial, backpack, bait station or hand.

## Quarantine Requirements

**Extinguish® Plus active ingredients meet USDA fire ant quarantine requirements.**

## Restricted-Entry Interval (REI)

12 hours for worker protection standards only.

## Application Timing

Apply as needed, when ants are active and foraging, and soil temperatures are above 60°F. Do not apply product within 6 hours of a rain event. Apply product when areas are dry from dew or irrigation.
