

# YOU NEVER KNOW WHAT **MITE** BE LURKING

**CLEARLEAF™ IS THE CLEAR CHOICE  
TO PROTECT PLANTS & PROFITS**

Mites and other insects have been plaguing your operation for too long, drawing necessary nutrients from your plants and potential profits from your bottom line. You need a solution formulated with mite species variety and resistance in mind. ClearLeaf™ Insecticide/Miticide, with mite and other greenhouse insect control, and resistance management, offers greenhouse operations a unique tool to protect plants and profits.

**CLEAR LEAF™**  
INSECTICIDE | MITICIDE

## PRODUCT DETAILS

- Three active ingredients: Tau-fluvalinate; Abamectin; Piperonyl butoxide
- Two modes of action from two classes of chemistries (3A & 6) plus a **Synergist**
  - Broad-spectrum control
  - Kills (multiple) (listed) insects and mite species

## FEATURES AND BENEFITS

- Synergized dual-acting miticide
- Combination of active ingredients are ideal for resistance management
- Helps limit replacement populations
- Non-phytotoxicity on a broad-spectrum of plant materials
- Works as part of a comprehensive IPM Program
- Helps operations to protect profits right up front and minimizes amount of spraying and tank mixing
- For commercial use for insect and mite control in greenhouses and lathe/shade houses as well as applications to outdoor areas on and around field grown trees, ornamentals, foliage cuttings, bedding plants, flowers, and woody herbaceous ornamentals

## ADDITIONAL PRODUCT INFORMATION

- May be applied using ground equipment sprayers, hand-held sprayers, power sprayers, foggers, or by ULV applicators
- Can be used as part of a tank mix with insecticides from different groups such as Enstar® AQ Insect Growth Regulator
- The addition of a synergist permits lower concentration rates of Tau-Fluvalinate and Abamectin

Available in 1 Qt and 1 Gal
