

Extinguish
PLUS

**KEEP YOUR
OPERATION**

FIRE ANT FREE

Extinguish® Plus fire ant bait can help protect nurseries against fire ants. Extinguish® Plus fire ant bait combines the killing speed of an adulticide and the long-lasting control of an insect growth regulator (IGR).

With its **two-way action**, Extinguish® Plus fire ant bait is economical to use with a great price per acre and **meets the USDA fire ant quarantine requirement.**

FIRE ANT FACT SHEET

CONTROLS

Imported and native fire ants (protein feeding), Southern (California) fire ants, harvester ants, big-headed ants and Argentine ants.

ACTIVE INGREDIENTS

IGR (S)-methoprene 0.25% and Hydramethylnon 0.365%.

MODE OF ACTION

The adulticide, Hydramethylnon, in Extinguish® Plus bait starts killing worker ants immediately after ingestion. Noticeable reduction in the number of active workers is seen within a week.

LONG-LASTING

The insect growth regulator (IGR), (S)-methoprene, sterilizes the queen to prevent rebound and mound movement. Colony will begin to decline within a week after the bait has been brought back to the mound.

AREA OF APPLICATION

May be applied to the following areas (please refer to the label for additional sites):

- Nurseries
- Sod farms
- Golf courses
- School grounds
- Rangeland
- Sports fields
- Parks
- Pastures
- Non-bearing fruit/nut trees

USE RATE

Broadcast – 1.5 pounds of product per acre

SIZE

1.5 lb., 4.5 lb., and 25 lb.

METHODS OF APPLICATION

All types — motorized spreaders, aerial, backpack, bait station or hand.

QUARANTINE REQUIREMENTS

Extinguish® Plus active ingredients meet **USDA fire ant quarantine requirements.**

RESTRICTED-ENTRY INTERVAL (REI)

12 hours for worker protection standards only

APPLICATION TIMING

Apply as needed, when ants are active and foraging, and soil temperatures are above 60°F. Do not apply product within 24 hours of a rain event. Apply product when areas are dry from dew or irrigation.

ENVIRONMENTAL PROFILE:

Extinguish® Plus baits can be used with confidence around livestock.
